ZONING ANALYSIS

- 1. Will the rezoning requested permit a use that is suitable in view of the use and development of adjacent and nearby property?***

Yes. The proposed development is for a single-family detached housing product which is like adjacent and nearby properties.

- 2. Will the rezoning requested adversely affect the existing use or usability of adjacent or nearby properties?***

No. The single-family detached building types are smaller than the typical nearby home but proposed with a similar lot size and overall density.

- 3. Does the property for which the rezoning is requested have a reasonable economic use as current zoned?***

Yes.

- 4. Will the rezoning requested create an overcrowding condition with respect to the existing streets, transportation facilities, or schools?***

No.

- 5. Does the rezoning requested conform to the Sugar Hill Land Use Plan?***

Yes. The proposed zoning and land use is compatible with the downtown character area.

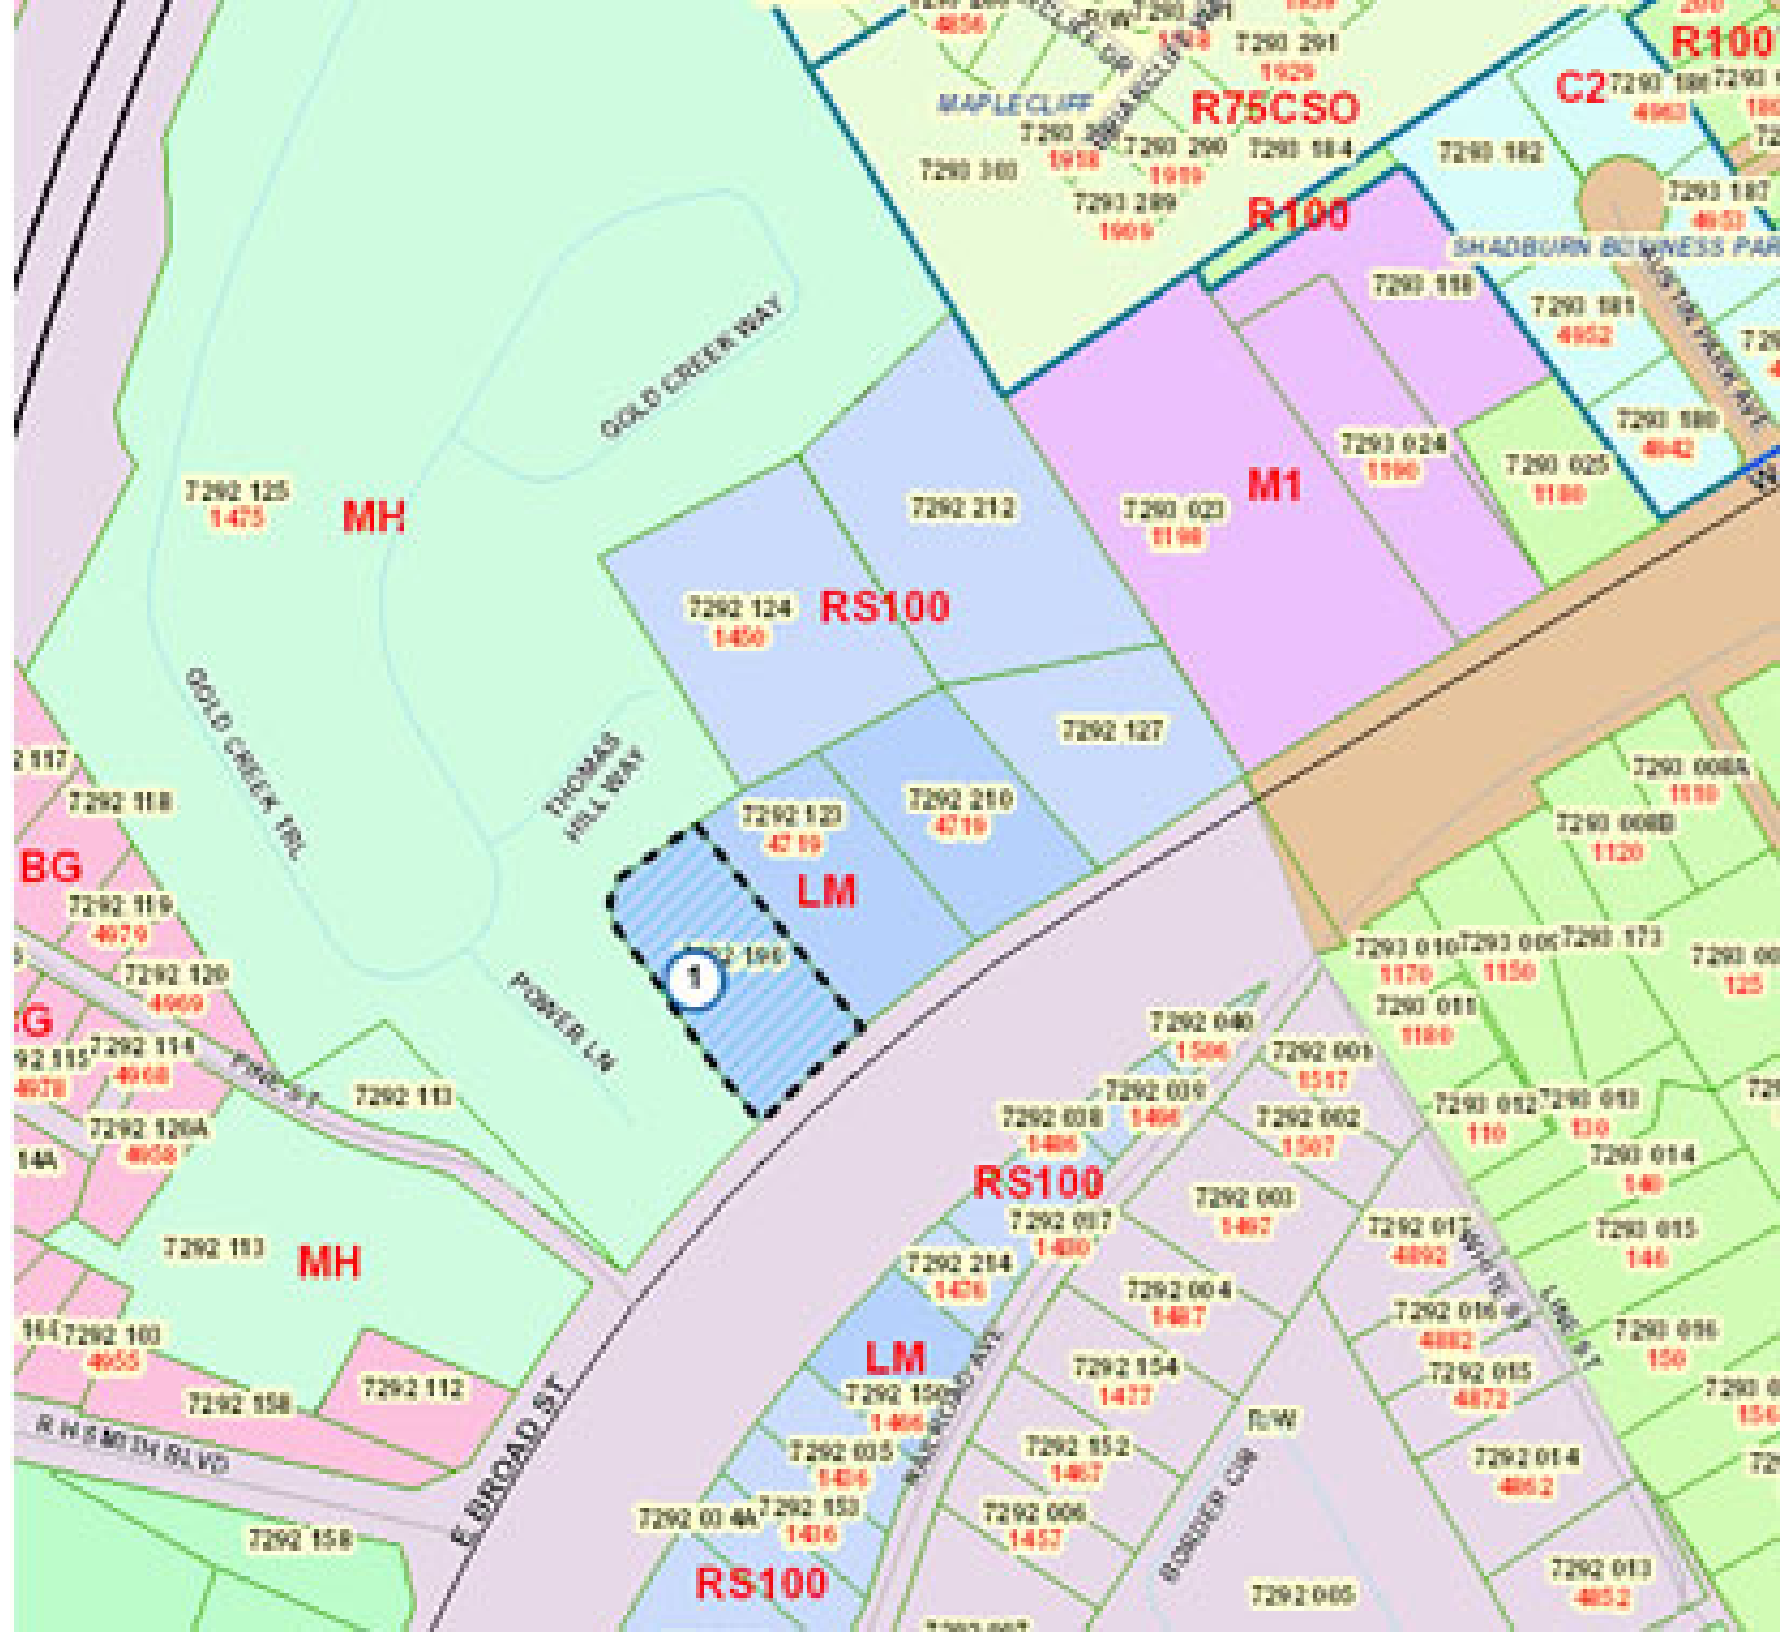

- 6. Are there other existing or changing conditions affecting the use and development of the property which would give support to an approval or disapproval of the rezoning request?***

Excerpts from the Comprehensive Plan (2019):

Develop transitional areas of housing between higher densities in the urban core and suburban residential areas.

Revitalize aging commercial and residential areas through redevelopment and infill strategies.

Improve connectivity between the downtown core and future growth areas.
