A Message From Our Stormwater Department

Rainwater is the only thing that should enter drainage ditches and storm drains.

Don't blow your clippings into the street. Leave grass clippings on the lawn. They are a natural fertilizer.

Compost plant clippings, leaves and other plant material or bag them for curbside pickup

Choose native grass and plants that require less fertilizer and water.

Cluster plants based on their needs and your yard's unique micro-ecosystem.

Use only what you need! This goes for water, fertilizer and pesticides.

Plant a variety of native plants and ones that attract beneficial insects and pollinators.

Ready to Dig?

We'll help you do it safely! Call 811 at least a few days before you start any digging project. Whether you are planning to do it yourself or hire a professional, smart digging means calling 811 before each job.
