This workshop was held in order to bring the city manager and the new council member up to date on some items the city was working on.

Mayor Crabb gave an update on complying with ADA requirements at city hall. She and Tony Bauman had been working with the Fire Marshall on things that needed to be done to make city hall ADA compliant. They plan on making one of the bathrooms a unisex bathroom, redo the parking lot for handicap parking, a hi-low water fountain will have to be installed. The city already has a grant for an elevator.
