## C.A.R.E.S

## Citizen Automated Response & Enforcement System

Sugar Hill citizens may alert City Departments of various concerns, complaints, or information requests through Sugar Hill C.A.R.E.S., a dynamic, web-based citizen relationship management tool. Citizens may visit the City's website at [www.cityofsugarhill.com](http://www.cityofsugarhill.com), to place non-emergency service requests from anywhere there is Internet access, 24 hours a day. Each entry is automatically assigned an ID number and instantly routed via e-mail to the department responsible for handling the request. Once issues are resolved, the citizens are automatically notified of the outcome. Currently, you may submit Public Works, Stormwater, Parks & Recreation and Planning & Development related service requests including code violations, and other code enforcement type complaints. We will continue to add new service request types to this system, so be sure to visit the website often. Report2Gov is a mobile app where residents may enter their non-emergency service requests using their mobile device. This app is available to both mac and android devices.
